

Acknowledgements

Between 2014 and 2016, the stakeholders and water managers of the Upper Feather River watershed worked together to develop an Integrated Regional Water Management Plan. This planning effort was funded by the California Department of Water Resources through the Proposition 84 and 1E Safe Drinking Water, Water Quality and Supply, Flood Control, River and Coastal Protection Bond Act of 2006, through a grant awarded to Plumas County Flood Control and Water Conservation District. Additional funding support was in the form of matching funds through watershed planning efforts, primarily from Plumas County.

The success of this Plan is owed to the insights and efforts of all of the participants over this more than two-year period. The relationships developed through the planning process will continue to benefit our region for years to come. Thank you to all regional participants, for the time invested and the expertise provided into this planning process. Those organizations and individuals identified below are listed as of their status on July 1, 2016; acknowledging that the status of many entities will change and that membership will grow in the future. These lists will be updated with other document updates, as appropriate.

We want to offer a special thank you to those stakeholders and individuals who participated in the workgroups throughout the process, especially the workgroup chairs who volunteered substantial amounts of time helping the workgroup coordinators keep the workgroups engaged and attending the RWMG meetings. We greatly appreciate your efforts on the Plan despite your busy schedules.

The RWMG is grateful for funding received by the Department of Water Resources to support the planning phase of the Upper Feather River IRWM Program. On behalf of the Upper Feather River RWMG, we want to thank Plumas County. This organization has provided financial and staff resources since the inception of the IRWM Program in 2008. The staff and RWMG are grateful for the organization's ongoing support and recognize that the progress made thus far would not have been possible without Plumas County's support. Finally, we would like to thank all those who have provided emotional, moral, and financial support to the Upper Feather River Integrated Regional Water Management Program and who are committed to securing and providing the necessary resources to support the families, communities, and ecosystems in our important watershed.

Regional Water Management Group (RWMG)

The authors would like to thank the members of the Upper Feather River Regional Water Management Group:

Plumas County Flood Control and Water Conservation District, Sherrie Thrall (Chair)
County of Sierra, Paul Roen (Vice-Chair)
County of Plumas, Terry Swofford
Feather River Resource Conservation District, Russell Reid
Sierra Valley Resource Conservation District, Bill Nunes
Sierra Groundwater Management District, Jim Roberti
Maidu Summit Consortium and Conservancy, Trina Cunningham
Plumas County Community Development Commission, Roger Diefendorf
Public member from the Almanor Basin, Jeffrey Greening
Plumas National Forest (Advisory), Joe Hoffman

Tahoe National Forest (Advisory), Quentin Youngblood
Lassen National Forest (Advisory)

Grantee and Project Manager: Plumas County Flood Control and Water Conservation District

The Integrated Regional Water Management planning process for the Upper Feather River Region was conducted through a grant secured and administered by the Plumas County Flood Control and Water Conservation District located in Quincy, California. Randy Wilson, Co-Manager, was the Project Manager and provided oversight and coordination between DWR, the RWMG, and Consulting Team.

IRWM Plan Process Design and Facilitation Team

Preparation of the Upper Feather River Integrated Regional Water Management Plan was coordinated by Uma Hinman Consulting and including a team of local and regional subconsultants. The Plan was prepared in accordance with the California Department of Water Resources' November 2012 and August 2016 IRWM Planning Guidelines, and per the instructions and preferences of the RWMG and stakeholders.

The following firms and individuals made up the Consultant Team, led by Uma Hinman Consulting.

Uma Hinman Consulting: Uma Hinman was Project Coordinator, process development, meeting facilitator, municipal services workgroup coordinator, and technical writer.

Leah Wills: Uplands and Forest Workgroup Coordinator, disadvantaged community outreach, project coordination.

Plumas GeoHydrology: Prepared two special studies including the Forest-Water Balances Study and the Community Vulnerability Study.

Deer Creek Resources: GIS mapping and analysis, website development and hosting, development of an online project database and mapping tool, and provided technical support services.

Michael Baker International: Preparation of the climate change vulnerability analysis and chapter, development of project-specific climate change and greenhouse gas emission analyses tools.

ECORP Consulting: Preparation of the climate change vulnerability analysis and chapter, and document preparation assistance.

Sierra Institute for Community and Environment: Prepared the Socioeconomic Assessment of the Upper Feather River Region.

Helix Environmental Planning: Technical writing.

California Indian Environmental Alliance (CIEA): Provided Tribal outreach and coordinated Tribal Advisory Committee involvement in the Plan Update process.

Kristi Jamason: Agricultural Lands Stewardship Workgroup Coordinator.

Holly Foster: Agricultural Lands Stewardship Workgroup Coordinator.

Terri Rust: Floodplains, Meadows, and Waterbodies Workgroup Coordinator.

Trina Cunningham: Disadvantaged community outreach and surveys.

Tamara Watson: Grant reporting and invoicing.
