

Drought Resiliency Workshop:

Let's Get Down & Dirty

Learn How Grazing & Irrigation Management Impact Soil Health and Effect Productivity

9:30am-12:30pm - Friday, Oct 2, 2015
Johnson Ranch, Arlington Rd, Taylorsville

Sponsored by:

Feather River Resource Conservation District
Natural Resources Conservation Service
UC Cooperative Extension

*Soils form the foundation for growing forage and raising livestock. We're going to Get Dirty to better understand Life in the Soil and HOW Management can improve productivity & drought resiliency. **Bring your questions and share your experiences so we can learn together!***

A one percent increase in soil organic matter in the top six inches of soil would hold approximately 27,000 gallons of water per acre or 8.4 gallons per square yard...which can grow more grass. Better soil health equals more grass and beef. *See you Oct 2nd!!*
