SUMMARY

The Integrated Regional Water Management (IRWM) Plan (Volume 1) is an implementation plan for the management of water resources throughout the Upper Feather River Watershed. The foundation for the IRWM Plan is the integration of seven existing plans by the statutory planning entities in the watershed. These plans all have statutory authority and are, therefore, mandatory. The mandatory plans are presented in this Volume 2 of the IRWM Plan.

The seven plans presented in this volume are from many different sources. Most of the documents are clear and legible, but some of the plans were in hardcopy format only and had to be scanned from the hardcopies. The resulting digital files are varied in quality.

The seven existing mandatory plans are summarized in Chapter 1, Volume 1 of the IRWM Plan.
